

OMNIBYTE TECHNOLOGY

SUMMARY OF RESPONSIBILITIES:

OmniByte Technology is a growing software company in Fargo, ND and we are hiring experienced innovators looking for a fun place to create and be challenged. As a Senior Software Quality Assurance (SQA) Engineer with OmniByte Technology, you will design, develop, and execute exploratory and automated tests to ensure product quality.

Our engineering team focuses on quality solutions and the latest technologies for business software developed in a mobile and cloud solution first and foremost, which reduces cost as a barrier to new technologies. We are looking for leaders in technology to join us in providing the highest of quality software and advanced services.

A Senior SQA engineer possesses strong, demonstrated capabilities in software testing, and is passionate about problem solving and building technologies which help businesses run more efficiently, improve quality, and reduce costs. They must be motivated to mentor others in solving problems in a multi-device world. We are looking for those that dare to share crazy ideas and ask a lot of questions.

Essential Duties & Responsibilities

- Review requirements specifications and other technical documents to provide timely and meaningful feedback.
- Define automation strategies and testing methods to ensure compliance with software design and requirements specifications.
- Estimate, prioritize, plan, and coordinate testing activities across multiple projects.
- Develop custom test tools and automated tests at either the application programming interface (API) or user interface (UI) level of moderate or greater complexity.
- Identify, log, and track bugs; proactively identify risks.
- Test products through all phases of the SDLC, including functional testing, regression/integration testing, and performance testing.
- Work towards continuous process improvements to increase the efficiency of the SQA team.
- Stay client focused and deliver a product that is centered around a great client experience.
- Possess a high level of initiative.
- Demonstrate strong interpersonal skills with an ability to work both independently and as part of a team.

Basic Qualifications

- BA/BS degree in Computer Science or related technical field or equivalent practical experience.
- 5+ years of experience testing and shipping high quality, commercial software or services.
- Strong knowledge of software quality assurance methodologies, tools, and processes.

- Hands-on experience with automated testing tools and/or developing custom test frameworks and harnesses.
- Knowledge and understanding of professional software engineering practices and best practices for the full software development life cycle, including coding standards, code reviews, source control management, build processes, testing, and operations.
- Demonstrated experience coaching and mentoring other SQA staff.
- Experience working on an Agile development team.
- Excellent written and verbal communication skills.

Preferred Qualifications

- Experience testing web and/or mobile applications (Android, iOS, Windows).
- Experience testing complex software systems that have been successfully delivered to clients.
- Experience providing direct customer support over the phone, face-to-face, or electronically.
- Understanding of distributed computing and enterprise-wide systems.
- Experience with SQL, Azure, object-oriented programming languages, and TFS.
- Experience with performance, load, and/or security testing.
